Recreation Realignment Analysis¹

August, 2001

Introduction

As the USDA Forest Service encourages a more business-like approach to recreation management, National Forest managers need to know (1) their client base and what their outdoor recreation preferences are; (2) how local populations are shifting and changing; and (3) what recreation services and facilities other agencies or private businesses are providing in the area. By understanding these dimensions of demand, National Forests can evaluate the need to realign their recreation programs to match regional and local demand conditions. This report is meant to provide current research-based information to help Forest staff in their realignment decisions.

Report Objectives and Data Sources

The objective of this report is to provide recreation managers information they can use to make recreation realignment decisions. An assumption underlying this report is that recreation realignment should be based on public demands for recreation opportunities and that current survey data can help managers better understand public demands. To measure demand, researchers at the Athens Research Lab have drawn a 75- mile straight-line market area radius around each forest. Using available survey data, the report summarizes who lives in this *market area*, their recreation participation and demographic change profiles, and the equity implications of managing for different recreation activities. The recreation participation survey data presented is from the National Survey on Recreation and the Environment (NSRE), an on-going national telephone survey sponsored by the US Forest Service. U.S. Census and the Woods and Poole, Inc. econometric projections are the sources for demographic data.

On Analysis Assumptions

The 75-Mile Market Area

Analyses in this assessment are based on a 75-mile market area. At least two considerations justify this 75-mile radius. First, past research has demonstrated that most national forest trips originate from within a 75-mile (1 ½ hour driving time) radius. Thus, most recreation trips derive from within the market area. Second, variation in preferences varies surprisingly little for broad population groups (i.e. age strata) across geographic areas. While these factors reassure us that the use of the market area provides a reasonable basis for guiding realignment decisions, the market area assumption does not hold in all cases. In particular, this assumption excludes the minority of recreationists who travel long distances to participate in activities -- the avid

¹ For clarification or further assistance, contact Ken Cordell at kcordell@fs.fed.us or call 706-559-4263.

backpacker, rockclimber, and snowbirder. Some forests are known for high-quality experiences among these niche users. We have designed a special exercise to account for enthusiasts and niche markets later in this report.

Combining Forests

Some reports have market areas that include two or more nearby Forests. This has been done for efficiency in producing reports, but also in recognition that these nearby forests share local markets and have similar geography and demographic patterns. A list of reports for individual and combinations of forests follows:

Realignment Reports Prepared

1. Ocala and Osceola National Forests
2. Apalachicola and Conecuh National Forests
3. Talladega, William Bankhead, and Tuskegee National Forests
4. Delta, Homochitto, Bienville, Desoto National Forests
5. Tombigbee and Holly Springs National Forests
6. Kisatchie, Sabine, Angelina, Davy Crockett, and Sam Houston National Forests
7. Ouachita and Ozark National Forests
8. Oconee and Sumter National Forests
9. Uwharrie National Forest
10. Francis Marion National Forest
11. Croatan National Forest
12. Chattahoochee National Forest
13. Nantahala, Pisgah, Cherokee National Forest
14. Jefferson National Forest
15. George Washington National Forest
16. Daniel Boone National Forest

Vision of Interactive Session: How to Use this Report

1. This report is designed to be used in a facilitated workshop. It consists of 10 “analysis” steps which are designed to familiarize workshop participants with four broad sets of data describing: (1) Who lives in the market area, and what their recreation preferences are (Steps 1-3); (2) How population is expected to grow and how this will impact recreation demand (Step 4-6); (3) What the “niche” recreation settings or activities are on the Forest and what segments of the population will or will not be served if these activities are emphasized (i.e., what the “Civil Rights — Title VI” implications of providing different niche activities are) (Steps 7-8); (4) What other local private suppliers in the market area are providing (Step 9); and finally, Summary Reflections and Conclusions (Step 10).
2. The report has been divided into the following 10 “steps”:
3. The 10-Step Program to Recreation Realignment
 - a. Step 1 Population Analysis - Summarizes population change in the market area;
 - b. Step 2 Recreation Participation Analysis/Activity Segmentation - Summarizes overall outdoor recreation participation and then segments these activities into three types;

- c. Step 3 Analysis of Highest Growth Outdoor Recreation Activities, 1995 - 2001 by type
- d. Step 4 Detailed Recreation Participation Analysis by Demographic Strata - Overviews population composition and expected growth of 7 major demographic groups (age, gender, race, income, household type, urban-rural, and disability status) for forest-based outdoor recreation activities;
- e. Step 5 Activity Score Summary Sheet - Summarizes frequency of forest-based activities from exercises in step 4;
- f. Step 6 Summing Activity Scores Over Steps 2-4;
- g. Step 7 Niche Activity Exercise - An exercise where each Forest identifies their most important Niche Activities;
- h. Step 8 Equity Analysis - An exercise that identifies what populations are being served by the management of these activity settings;
- i. Step 9 Private Suppliers of Outdoor Recreation Analysis - An overview of what other suppliers in the market area provide, and;
- j. Step 10 Summary, Concerns and Follow-up - An opportunity for participants to record observations, concerns, and questions raised in steps 1-9.

Working through the steps above and using managers' local knowledge of users, their resource, and other providers in a National Forest market area, it is envisioned that a Forest can better target recreation provision for the benefit of the public. All information provided in this report is the product of available data. Not all potentially useful data is available; however. This report provides as much current data as possible within a limited timeframe and budget for use in realignment decisions. This report has been designed for use in an interactive meeting or workshop. Appendices have been designed for reference during the workshop and to be kept as a desk reference for future use.

Report Contents

- I. Report Text
 - ▶ The Realignment Context: Some General Observations About Outdoor Recreation in the Southern Region.
 - ▶ Analysis Steps 1-10 with graphics and bullet statements highlighting key findings and guiding managers through 10 analytical exercises or steps exploring the customer base, its recreation participation profiles, and its changing demographic composition.
- II. Appendices
 - ▶ A complete set of formatted data tables:
 - ▶ Appendix I: descriptive statistics about counties in the market area;
 - ▶ Appendix II: detailed population growth and demographic data describing changes in the market area, including state and regional comparisons, temporal comparisons (1990 - 2000) and projections out to 2020.
 - ▶ Appendix III: total participation profiles for 1995 and 2001 by activity for over 40 activities and detailed demographic information describing who participates in these activities;
 - ▶ Appendix IV: non-Forest Service outdoor recreation providers in market area.

**The Realignment Context:
Some General Observations About Outdoor Recreation in the Southern Region²**

- ▶ Top recreation activities in which Southerners participate include walking for pleasure, attending family gatherings, visiting nature centers, sightseeing, driving for pleasure, picnicking, viewing or photographing natural scenery, and visiting historic sites. Far down the list in popularity are high technology, high skill activities such as rock climbing and whitewater kayaking that often occupy much of the attention of forest recreation managers.
- ▶ Participation in most outdoor recreation activities has been growing steadily over the last few years. Of forest-based activities, viewing and photographing fish, wildlife, birds, wild flowers, and native trees are among the fastest growing in the South. Other fast growing activities include jet skiing, kayaking, day hiking, and backpacking.
- ▶ To Southerners, outdoor recreation is a highly important part of their lifestyles. But because of climate and types of forest settings, the abundance of forests in the South, in comparison with other less forested regions of the country, does not result in higher forest recreation participation.
- ▶ Twenty-six percent of residents of the South participate in gathering a wide variety of non-timber forest products (NTFPs). Most do so non-commercially. Sustaining availability of some NTFP resources will depend in large part on institutional capacities for education, monitoring, incentives, land management, and other conservation actions.
- ▶ Numerous recreation opportunities of many types are available across the South. They are found in a wide variety of settings, ranging from large tracts of undeveloped land to highly developed theme parks in largely urban settings, both in public and private ownerships.
- ▶ Of public ownerships, federal tracts typically are large and mostly undeveloped. They fill a niche of providing backcountry recreation. State parks and forests are usually smaller and more developed. They provide camping, picnicking, swimming, fishing, nature interpretation, and scenery.
- ▶ The outdoor recreation supply potentials of public lands will depend on policy evolution. On Southern National Forests, greater protection of roadless lands is likely, while at the same time recreation is increasingly finding its way to the tops of the priority lists of national

² Cordell, H. Ken and Michael A. Tarrant. 2002. Socio-6: Forest-based Outdoor Recreation. Wear, David N. and John G. Greis (eds.). Southern Forest Resource Assessment Final Report. General Technical Report SRS-xx. Asheville, NC: US Department of Agriculture, Forest Service, Southern Research Station.

forest managers. These trends are not as yet, but should be linked by explicit policies. National Parks will serve a different supply role because they are managed first to protect park resources and secondly for public enjoyment. On Fish and Wildlife Service refuges, recreation is viewed as an incidental or secondary use and is not allowed unless it is directly related to a refuge's primary purposes.

- ▶ While continuing to grow, adjust and adapt, Southern state land systems, especially state parks, have reached a point of seeming maturity as a recreation resource, except for expansion of high-end resort developments which provide better sources of revenue.
- ▶ Recreation access to private land is increasingly limited to the owners themselves, their families or friends, and lessees. The number of Southern private owners allowing the public to recreate on their land has been decreasing over time.
- ▶ Accommodating future public recreation demand increases will likely fall mostly to public providers, most of whom will likely continue to face significant budget and capacity constraints. Some of this pressure would be reduced if private owners, the primary group of forest owners in the Region, were willing to open more of their vast forested land holdings to public recreation. Current trends are not promising, however. Increasing demands for off-road vehicle use, hunting, fishing, and other of the more consumptive recreational activities are likely to bring about more recreation participant/land owner conflicts over time.
- ▶ As forest recreation demands grow, recreation activities are likely to conflict more with each other, especially on trails, in backcountry, at developed sites, on flat water (large rivers and lakes), in streams and whitewater, and on roads and their nearby environs. Typically a greater degree of conflict is perceived by one group of recreation users (usually traditional and non-motorized users) than is perceived by other groups (usually non-traditional and mechanized/motorized users).
- ▶ Depending on the characteristics of recreation use, the forest site, and site management, recreation can have a variety of impacts on soils, water, vegetation and animal life. Almost all types of recreation activity have impacts, but this is especially so for motorized uses.
- ▶ Forested areas in the South with heavy recreation pressures include the coastal Carolinas; coastal Florida; coastal Alabama, Mississippi, and Louisiana; the "Piedmont Crescent," south central Mississippi, the Ozark and Ouachita Mountains, and northeastern West Virginia.

Step 1. – Population Analysis

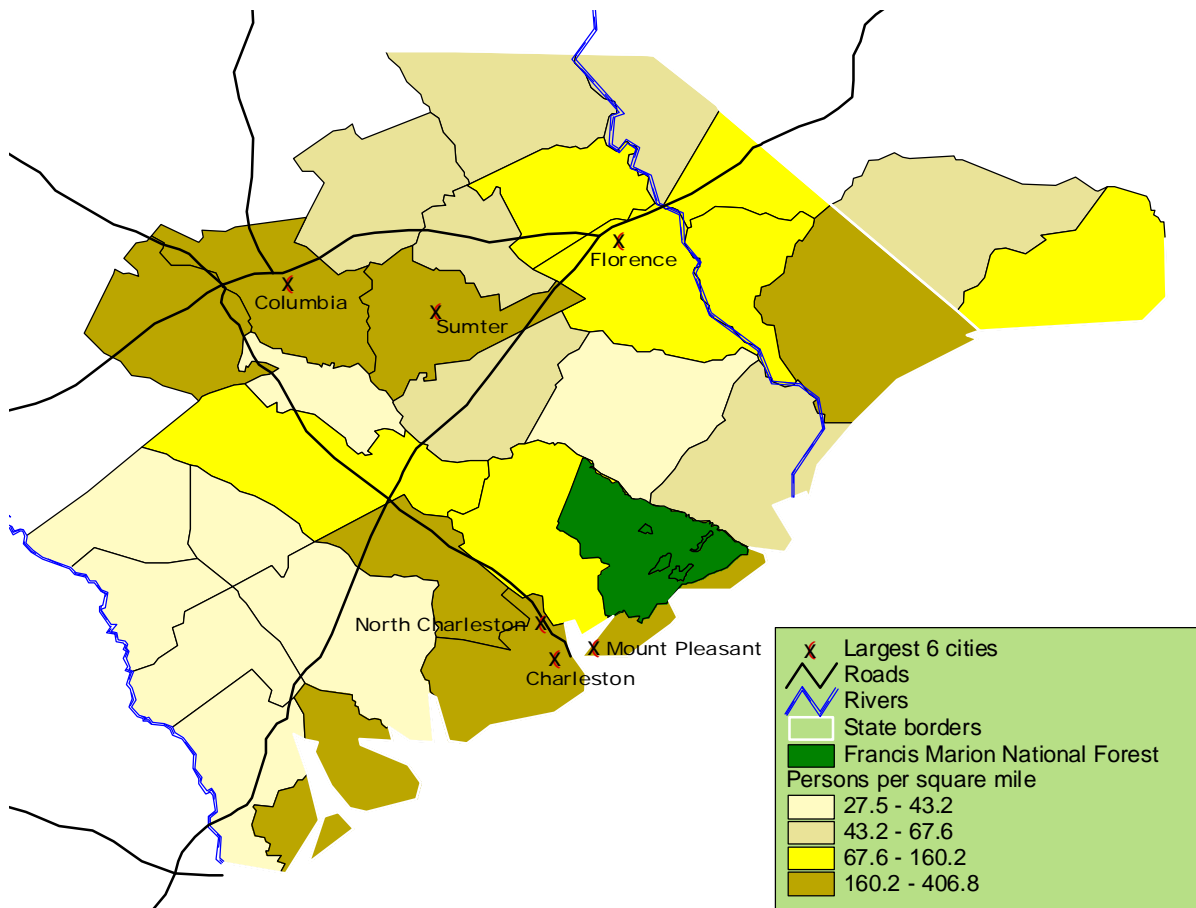

Step 1.1 -- The Market Area Defined

- Through out this report, data will be presented under the heading “Market Area.” The Market Area is defined as all counties that fall within a 75-mile straight-line radius from the forest border. The market area of this report for the Francis Marion National Forest is shown above.

Step 1. – Population Analysis

Step 1.2 -- Persons Per Square Mile by County in Market Area

- ▶ This map shows the number of persons per square mile by county in the market area. Counties with the darkest shading have the most dense populations (160.2-406.8 persons per square mile).
- ▶ Its clear that many of the more dense counties in this market area occur along the Interstate 26 and Interstate 20 corridors and in the coastal counties.
- ▶ As population in the market area grows and develops, public lands in the area will increasingly be seen as a place of relaxation, a quiet, peaceful retreat from the built community.

Step 1. – Population Analysis

Step 1.3 -- Total Population, 1990 - 2020, and Projected Percent Change 2000 - 2020 in Market Area and Region

Source: Table I. 1

- ▶ This figure shows total market area and regional population, 1990 - 2020.
- ▶ You currently have 2,371,900 persons in your market area.
- ▶ As you can see from the inset box, this market area has much higher expected growth than the region as a whole. As such, you can probably expect greater pressure from recreation on your Forest than on forests in the region as a whole (cf. Table I a.2).

Step 1. – Population Analysis

Step 1.4 -- Fastest and Slowest Growing Counties, 2000- 2020

Fastest Growing	Projected Percent Change, 2000-2020	Slowest Growing	Projected Percent Change, 2000-2020
1) Brunswick, NC	83.7	1) Williamsburg, SC	7.1
2) Lexington, SC	70.2	2) Hampton, SC	7.0
3) Horry, SC	59.6	3) Bamberg, SC	5.4
4) Dorchester, SC	54.8	4) Dillon, SC	2.5
5) Berkeley, SC	47.6	5) Marlboro, SC	-7.7

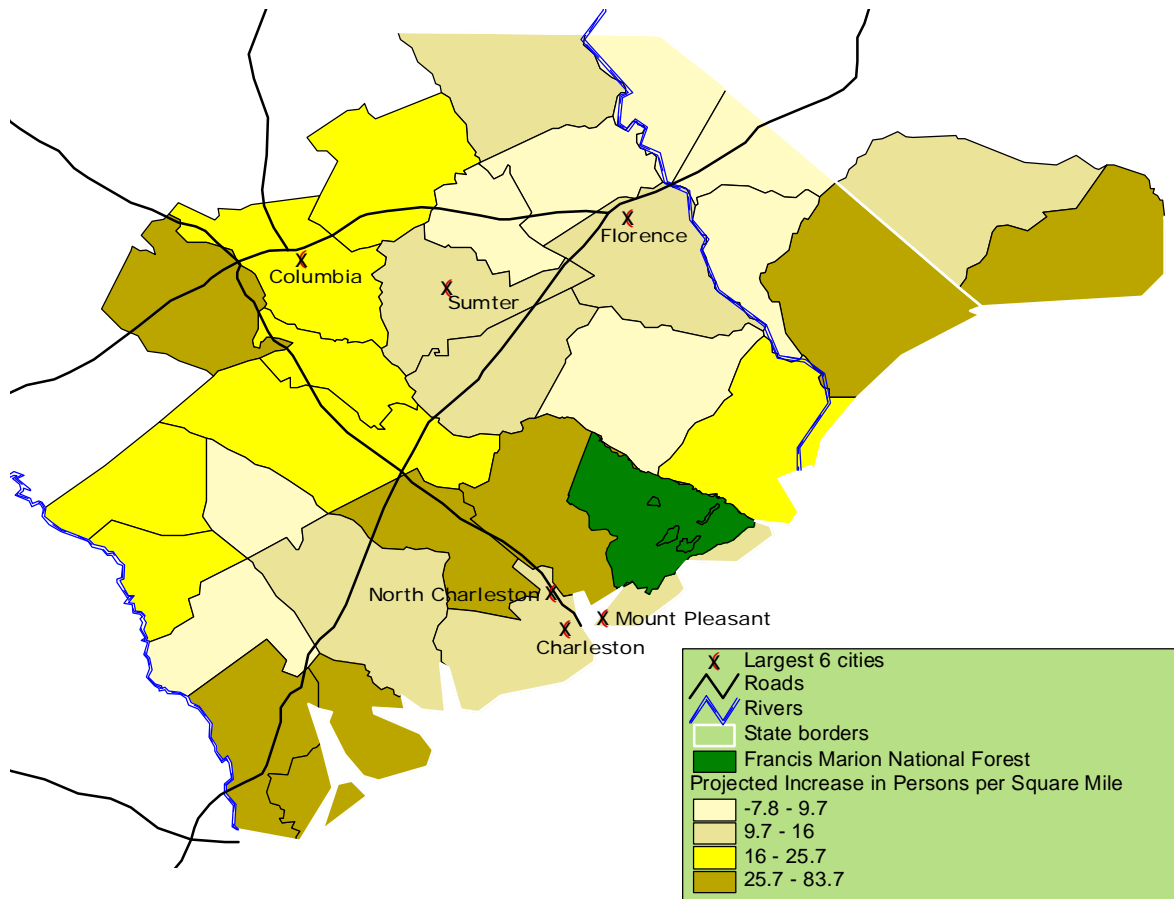

- ▶ The table above lists the 5 fastest and 5 slowest growing counties in your market area. For a complete list of all counties by population growth, see Appendix I, Table 1 “Overview of Market Area”.
- ▶ **Exercise:** Using the box below, list all the counties which are adjacent to your management area. List all that you can recall. Then go to Appendix I, Table 1 and record the projected population growth for each county you listed. This will familiarize you with population change in your work area.

Step 1.5 -- Projected Population Change in Counties Nearest My Districts (Source: Table I. 1)

County Name	Projected Population Change 2000-2020 (%)

Step 1. – Population Analysis

Step 1.6 -- Projected Increase in Persons Per Square Mile 2000 - 2020

- ▶ The map on this page shows the projected growth in persons per square mile in your market area. The counties with the darkest yellow shading are increasing most in density (i.e., in persons per square mile).
- ▶ **Exercise:** Noting the population trends and changes that are expected and the geographic patterns of faster- or slower-growth counties, take a moment to reflect on the implications concerning which Forest corridors and recreation areas might be most impacted in the future. Record your observations below:

Step 1.7 -- Observations on Locational Implications of Growth on my Forest and Districts

Step 2. – Recreation Participation Analysis and Segmentation of Activities

- ▶ Population growth and change represents one important dimension of recreation realignment. As populations grow there is likely to be greater recreation demand, but for which activities?
- ▶ In Steps 2-4 to follow, we will explore 3 separate dimensions of demand. First, we explore the 20 top activities in the region in terms of overall participation (Step 2). Second, we explore the fastest growing activities (Step 3). Finally, we look at activity demand by demographic strata and growth in demographic strata (Step 4). Then, in Steps 5 and 6 we combine these dimensions to arrive at a “big picture” of market area recreation demand.
- ▶ Step 2: The table on the following page -- “Top 20 Recreation Activities in Order of Popularity” -- represents a first “cut” in understanding demand for outdoor recreation. It presents the 20 most popular outdoor activities in the region as a whole by the percentage and number of persons participating at least once/year. As broadly enjoyed outdoor activities, these can be thought of as representing core general demands of the public at large for outdoor recreation.
- ▶ Take a minute to review the most popular activities for the region in order of popularity.
- ▶ In order to target outdoor recreation activities most relevant to forest settings *and to your market area* we next segment these activities into three types.

Step 2.1 -- Top 20 Activities in the Region in Order of Popularity (Source: Table III. 3a)

Activity	Region 8	
	Percent participated 2001	Number (millions) participated 2001
Walk for pleasure	81.0	55.97
Family gathering	72.3	49.96
View/photograph natural scenery	55.5	38.35
Visit nature centers, etc.	53.1	36.69
Sightseeing	51.4	35.52
Driving for pleasure	50.6	34.96
Picnicking	49.1	33.93
Visit historic sites	43.1	29.78
View wildlife	42.5	29.37
Swimming in natural water	40.0	27.64
Bicycling	34.2	23.63
View birds	30.8	21.28
Visit a wilderness	29.5	20.38
Warmwater fishing	28.5	19.69
Gather mushrooms, berries, etc.	26.9	18.59
Day hiking	26.2	18.10
Visit waterside besides beach	25.9	17.90
View or photograph fish	25.5	17.62
Developed camping	21.9	15.13
Visit archeological sites	19.7	13.61

Step 2.2 -- Segmentation of Activities

Step 2.2a -- Type I Activities - These are activities that are *broadly popular across demographic groups in your market area*. Because of their common popularity, it is recommended that managers broadly provide these wherever possible, especially those with more than 50 percent participation.

Type I Activities - Broadly Popular Activities in Market Area; Percent and Number of Participants (in millions) (Source: Table III. 3b)

	% Participated	# Participants
Walk for pleasure	83.5	1.53
Family gathering	70.7	1.29
View/photograph natural scenery	53.7	0.98
Visit nature centers, nature, museums, etc	52.6	0.96
Visit historic sites	49.1	0.90
Picnicking	45.9	0.84
Sightseeing	45.8	0.84
Driving for pleasure	45.6	0.83
Bicycling	43.0	0.79
Boating	37.0	0.68
Motorboating	26.3	0.48

(Source: Table II, 3a)

- **Exercise:** In the space provided below, record all activities that over 50 percent of the public in your market area enjoys at least once/year.

Step 2.2a1 — Activities Enjoyed by at least 50 percent of your Market Area

- For the remainder of the report, we focus on Type II and Type III activities. These are activities at the mid-levels of popularity (Type II) and “niche” activities (Type III).

Step 2.2b — Type II Activities - These are activities in the mid-range of popularity which are *especially suitable for National Forests*. It is recommended that managers provide opportunities for the most popular of these activities among residents of your market area. This idea of focusing on the most popular activities will be carried forward later in this analysis (in Step 6) where activities are scored across multiple criteria, popularity being one.

Type II Activities -- Activities Especially Suitable for NFs settings; Percent and Number of Participants (in millions) (Source: Table III. 3d)

	% Participated	# Participants
Swimming in streams, lakes, ponds, or the ocean	47.2	0.86
View wildlife	40.9	0.75
View or photograph wildflowers, trees, or other natural vegetation	36.7	0.67
View birds	28.6	0.52
View or photograph fish	28.5	0.52
Warmwater fishing	28.5	0.52
Visit waterside besides beach	28.3	0.52
Gather mushrooms, berries, and other non-timber products	25.2	0.46
Visit a wilderness or other primitive, roadless area	25.1	0.46
Mountain biking	21.4	0.39
Drive off-road	17.5	0.32
Developed camping	14.0	0.26
Day hiking	13.9	0.25
Small game hunting	10.8	0.20
Big game hunting	8.6	0.16
Primitive camping	6.9	0.13
Backpacking	6.1	0.11
Horseback riding	5.7	0.10
Horseback riding on trails	5.0	0.09

Step 2.2c — Type III Activities - *Niche Activities* are activities that take advantage of unique, high quality opportunities and representing mostly enthusiast users on your forest. Because of their special nature, it is recommended you emphasize when your resources are unique and high quality.

Type III Activities - Niche Activities for Forests with Unique Resources; Percent and Number of Participants (in millions) (Source: Table III. 3f)

	% Participated	# Participants
Saltwater fishing	18.9	0.35
Visit archeological sites	17.3	0.32
Waterskiing	9.2	0.17
Rafting	8.3	0.15
Coldwater fishing	7.9	0.14
Snorkeling or scuba diving	4.9	0.09
Canoeing	4.2	0.08
Kayaking	4.1	0.07
Migratory bird hunting	3.2	0.06

Step 3. – Analysis of Fastest Growing Outdoor Recreation Activities

(Source: Table III, 3e)

Activity	Absolute change (Millions), 1995 to 2001	Percent change in number of participants, 1995 to 2001
Backpacking	0.06	103.3
View or photograph fish	0.21	53.2
Horseback riding on trails	0.03	47.1
View wildlife	0.25	39.6
Big game hunting	0.04	21.1
Swimming in streams, lakes, ponds, or the ocean	0.16	13.5
Developed camping	0.05	12.0
View birds	0.08	10.9
Horseback riding	0.01	5.6
Small game hunting	0.02	0.0
Drive off-road	0.02	-0.6
Day hiking	0.00	-6.7
Warmwater fishing	0.00	-7.8
Primitive camping	-0.01	-15.9

- ▶ A second important dimension of demand in the market area is captured by considering which outdoor recreation activities are growing fastest in terms of total participation. Some activities are in decline while others are increasing in demand. In this table, Type II activities are organized by rate of growth from 1995-2001 in your market area. Those which have experienced the highest rate of growth are at the top of table.
- ▶ **Exercise:** In the space provided below, please record the fastest growing Type II activities in your market area. Record up to 6 activities. Remember the absolute change numbers are in millions of participants.

Step 3.1 -- Fastest Growing Activities in your Market Area

Step 4. – Recreation Participation Analysis by Demographic Strata

- We have overviewed 2 dimensions of demand, total participation (i.e., most popular activity) and fastest growing activity 1995-2001. In Step 4, we walk through an analysis the recreation preferences of each of 7 demographic categories (e.g., age, gender, household size, race, income, urban-rural status and disability status). For each one, first we summarize the distribution of the population by strata (e.g. age strata). Second, we consider the current recreation preferences of each strata. Finally, we examine the projected growth of each strata and consider the implications of this projected growth for recreation demand. We start with age and proceed from there. In the end, we will summarize what we have learned about demand in the market area across all demographic groups.

Step 4.1 – Age

(Source: Table II. 2b,c)

- The age distribution of the population differs to some extent from market area to market area. In part, this is related to the strength of area economies, migration and immigration. The age distribution is important to consider in recreation management because people's outdoor recreation activities are highly age dependent. The previous figure shows the distribution of ages in the region and market area.

Step 4.1.a – Current Age Distribution

- The table below lists avored activities by age strata. The activities listed for each strata below are those in which the age strata makes up a disproportionately greater share of the participants compared to their percentage of the population as a whole. This can be interpreted as activities each age strata favors. If you manage for such favored activities, which activities would you emphasize?

Favored Activities by Age Strata (Source: Table III. 4b1-6)

Age Strata	Favored Activities	Percent of Age Strata in Market Area
15-24	1. Horseback riding on trails 2. Backpacking 3. Horseback riding	15.2
25-34	1. Big game hunting 2. Primitive camping 3. Drive off-road	13.5
35-44	1. Developed camping 2. Day hiking 3. View or photograph fish	16.1
45-54	1. Horseback riding 2. View or photograph fish 3. Warmwater fishing	13.2
55-64	1. Small game hunting 2. View or photograph wildflowers, trees, or other natural vegetation 3. Mountain biking	8.6
65+	1. View birds 2. View or photograph wildflowers, trees, or other natural vegetation 3. View or photograph fish	11.1

Step 4.1.b – Future Age Distribution

How Will Population Age Structure Change 2000 - 2020? (Source: Table II. 2e)

Age Group	Market Area		Region 8	
	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020
15-24	67.7	18.8	1,865.6	14.7
25-34	75.9	23.7	2,460.7	20.5
35-44	-11.0	-2.9	-708.3	-5.0
45-54	39.5	12.6	826.0	6.9
55-64	209.8	102.5	6,339.3	80.6
65 & older	244.7	92.9	7,363.5	65.4

- ▶ In the future, the population of the United States is expected to age. The median age in the United States has risen steadily since the 1800s in part due to increases in medical technology and hygiene, and rising real income. In 1850, the median age was 18.9 years, in 1990 it was 32.8. By 2020, the median age is expected to increase 8.5 percent to about 38 years. As the population ages, their recreation preference profile will change. Activities that older people like to do will become more popular and enjoy increases in demand on recreation areas.
- ▶ The table above shows percent increases in each of the age strata in the market area, 2000 - 2020.
- ▶ 65+, 55-64, and 25-34 are the highest growth strata (in absolute numbers) in the market area.
- ▶ Given the aging of the market area, which activities does this suggest you might market to/provide more of in the future?

Step 4.1.c – Favored Activities of Fastest Growing Age Groups

(Source: Table III. 4b1-6)

High Growth Age Strata	Favored Activities
65+	<ol style="list-style-type: none">1. View birds2. View or photograph wildflowers, trees, or other natural vegetation3. View or photograph fish
55-64	<ol style="list-style-type: none">1. Small game hunting2. View or photograph wildflowers, trees, or other natural vegetation3. Mountain biking
25-34	<ol style="list-style-type: none">1. Big game hunting2. Primitive camping3. Drive off-road

Step 4.2 – Gender

(Source: Table II. 8)

Step 4.2.a – Current Gender Composition

- ▶ Gender is highly important as well as a determinant of the activities people chose. Women prefer some activities in much higher numbers than men. Thus the gender distribution and different preferences of men and women are important considerations in supplying outdoor recreation programs to serve the public. The figure above shows the gender distribution in the region and market area.
- ▶ If you marketed for activities disproportionately preferred by gender, which activities would you emphasize?

Favored Activities by Gender Strata (Source: Table III. 4a1-2)

Gender Strata	Favored Activities	Percent of Gender Group in Market Area
Female	<ol style="list-style-type: none"> 1. View birds 2. Horseback riding 3. View or photograph wildflowers, trees, or other natural vegetation 4. Horseback riding on trails 5. Gather mushrooms, berries, and other non-timber products 	48.2
Male	<ol style="list-style-type: none"> 1. Small game hunting 2. Big game hunting 3. Backpacking 4. Primitive camping 5. Mountain biking 	51.8

- Because the gender distribution does not tend to vary across time (i.e. the proportion of males and females generally stays the same), we will not consider the projected change in gender composition, as we will for other demographic categories.

Step 4.3 – Household Size

(Source: Table II. 3b)

Step 4.3.a – Current Household Distribution

- ▶ The household type varies somewhat from market area to market area. In part, this is related to the age, wealth and ethnic structure of an area. Different household types (families, singles, childless couples, retirees, etc) may have different recreation setting and experience preferences. The figure above shows the distribution of regional and market area residents by household size.
- ▶ If you managed for household types, which activities would you emphasize?

Favored Activities by Household Type (Source: Table III. 4c1-5)

Household Type Strata	Favored Activities	Percent of Household Type Group in Market Area
1 person household	1. Small game hunting 2. Mountain biking 3. Gather mushrooms, berries, and other non-timber products	22.7
2 person household	1. Backpacking 2. View or photograph wildflowers, trees, or other natural vegetation 3. Day hiking	32.3
3 persons household	1. Primitive camping 2. Gather mushrooms, berries, and other non-timber products 3. Big game hunting	18.3
4 person household	1. Horseback riding on trails 2. Horseback riding 3. Big game hunting	16.1
5 or more	1. Visit waterside besides beach 2. Developed camping 3. Horseback riding	10.6

Step 4.3.b – Future Household Distribution

How Will Household Structure Change 1998 - 2003? (Source: Table II. 3e)

Household Size	Market Area		Region 8	
	Absolute change (1000's), 1998-2003	Percent change, 1998-2003	Absolute change (1000's), 1998-2003	Percent change, 1998-2003
1 person	18.7	10.0	961.5	12.1
2 person	20.8	7.9	1080.5	9.9
3 person	0.5	0.3	174.2	3.1
4 person	2.3	1.7	241.4	4.8
5 persons or more	0.4	0.5	134.0	4.3

- ▶ In the future in the United States the population will continue to age and young people are expected to continue to delay marriage until their mid- and late- 20s. As these trends “mature” in the future, there are likely to be fewer larger households in the United States as a whole.
- ▶ The table above shows percent increases in each of the household strata in the market area, 1998 - 2003.
- ▶ 2-person, 1-person, and 4-person households are the highest growth strata.
- ▶ Given the nature of changing household structure to smaller sized households in the market area, which outdoor recreation activities would you want to consider providing more of in the future?

Step 4.3.c – Favored Activities of Fastest Growing Household Size

High Growth Household Type Strata	Favored Activities
Highest growth	1. Backpacking 2. View or photograph wildflowers, trees, or other natural vegetation 3. Day hiking
2 nd Highest growth	1. Small game hunting 2. Mountain biking 3. Gather mushrooms, berries, and other non-timber products
3 rd Highest growth	1. Horseback riding on trails 2. Horseback riding 3. Big game hunting

Step 4.4 – Race & Ethnicity

(Source: Table II. 4c-f)

Step 4.4.a – Current Race/Ethnic Distribution

- ▶ Shifting racial and cultural ethnicity of the population is one of the most dramatic of social changes occurring in the United States. While a little less pronounced in this region than in others, growth of the Hispanic and Asian populations in the U.S. is occurring at rates sufficient for size of these groups to exceed the African American population before the end of the century. The race and ethnic distribution is important to consider in recreation management because people's outdoor recreation activities tend to differ across race strata. The figure above shows the distributions of residents in the region and market area residents by race/ethnicity.
- ▶ If you managed for recreation activities preferred by one race class more than the population as a whole, what activities would you emphasize?

Favored Activities by Race Strata (Source: Table III. 4d1-4)

Race Group Strata	Favored Activities	Percent of Race Group in Market Area
Anglo Americans	1. Day hiking 2. Primitive camping 3. Backpacking	63.2
African American	1. Mountain biking 2. Small game hunting 3. View or photograph fish	35.6
Asian Americans/ American Indians	1. Horseback riding on trails 2. Gather mushrooms, berries, and other non-timber products 3. Horseback riding	1.2
Hispanic Americans	1. Day hiking 2. Mountain biking 3. Developed camping	2.1

Step 4.4.b – Current Race/Ethnic Distribution

How Will the Race and Ethnicity of the Population Change 2000 - 2020? (Source: Table II. 4h)

Race/ethnicity	Market Area		Region 8	
	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020
Anglo American	480.6	32.1	14,545.5	20.8
African American	246.0	29.1	4,825.3	28.9
Asian/American Indian	7.7	26.4	1,776.3	79.3
Hispanic American	74.7	149.3	7,931.9	80.2

- Over the next 50 years, the racial composition is projected to change dramatically in the United States. Between 1990 and 2050, the proportion of Anglo Americans are expected to decline from more than 76 percent to just over 50 percent. Shortly thereafter, Anglo Americans will no longer be a numerical majority. Considerable growth is expected in Hispanic populations in particular. As increases occur more in some race strata than others, the activities that these strata participate in are likely to experience increased demand.

- ▶ The table above shows percent increases in each of the race strata in the market area, 2000 - 2020.
- ▶ Anglo American, African American, and Hispanic American groups are the highest growth strata.
- ▶ Given the changing racial composition in the market area, which activities would you want to consider providing more of in the future?

Step 4.4.c – Favored Activities of Fastest Growing Race Group

High Growth Race Group Strata	Favored Activities
Highest growth race group	1. Day hiking 2. Primitive camping 3. Backpacking
2 nd highest growth race group	1. Mountain biking 2. Small game hunting 3. View or photograph fish
3 rd highest growth race group	1. Day hiking 2. Mountain biking 3. Developed camping

Step 4.5 – Income

(Source: Table II. 5b,c)

Step 4.5.a – Current Income Distribution

- ▶ Income is very much linked to recreation participation choices. Incomes in the South have been rising, but not uniformly. Some counties still have persistently high levels of poverty and some have actually declined a little in real income. Income gains or losses in a market area can provide another source of information about how to align recreation management with demand conditions.
- ▶ If you marketed to current income groups, which activities would you emphasize?

Favored Activities by Income Strata (Source: Table III. 4e1-11)

Income Strata (dollars) K=1,000	Favored Activities	Percent of Income Group in Market Area
< \$10K	1. Small game hunting 2. Mountain biking 3. Horseback riding	15.1
\$10-\$20K	1. Visit a wilderness or other primitive, roadless area 2. View or photograph wildflowers, trees, or other natural vegetation 3. Backpacking	16.1
\$20-\$29K	1. Drive off-road 2. View birds 3. View or photograph fish	16.8
\$30-\$39K	1. Big game hunting 2. Backpacking 3. Primitive camping	17.3
\$40-\$49K	1. Drive off-road 2. Visit waterside besides beach 3. Backpacking	12.7
\$50-\$59K	1. Horseback riding 2. View birds 3. Big game hunting	8.3
\$60-\$75K	1. Horseback riding 2. Gather mushrooms, berries, and other non- timber products 3. Small game hunting	6.7
\$75-\$100K	1. Horseback riding 2. Swimming in streams, lakes, ponds, or the ocean 3. View wildlife	4.0
\$100-\$125K	1. Drive off-road 2. View birds 3. Developed camping	1.3
\$125K >	1. Backpacking 2. Primitive camping 3. Developed camping	1.5

Step 4.5.b – Income Distribution

How Will Population Income Change 2000 - 2020? (Source: Table II. 5e)

Income category (K = \$1000)	Market Area		Region 8	
	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020
< \$10K	-28.8	-21.8	-1,351.7	-28.3
\$10-\$20K	-27.9	-19.8	-1,437.1	-27.4
\$20-\$29K	-25.2	-17.2	-1,278.2	-23.9
\$30-\$39K	25.9	17.1	231.9	4.2
\$40-\$49K	108.4	97.4	2,519.8	59.5
\$50-\$59K	96.2	133.2	2,897.0	100.9
\$60-\$75K	78.2	132.7	2,857.2	115.7
\$75-\$100K	46.8	133.3	2,005.4	122.1
\$100-\$125K	15.4	131.6	756.4	123.1
\$125K >	17.6	128.4	923.2	120.7

(Source: Table II, E.3)

- ▶ In the future, income in the United States is expected to rise. The table above shows percent increases in each of the income strata in the market area, 2000-2020.
- ▶ \$40,000-\$49,000; \$50,000-\$59,999; and \$60,000-\$75,000 groups are the highest growth strata in the market area.
- ▶ Given the changing income composition in the market area, which activities would you want to consider providing more of in the future?

Step 4.5.c – Favored Activities of Fastest Growing Income Group

High Growth Income Strata	Favored Activities
Highest growth income group	1. Drive off-road 2. Visit waterside besides beach 3. Backpacking
2 nd highest growth income group	1. Horseback riding 2. View birds 3. Big game hunting
3 rd highest growth income group	1. Horseback riding 2. Gather mushrooms, berries, and other non-timber products 3. Small game hunting

Step 4.6 – Urban and Rural

Step 4.6.a – Current Urban and Rural Distribution

(Source: Table II. 6b)

- ▶ The urban/rural distribution of the population differs from market area to market area. Urban populations are growing at much faster rates and numbers than rural populations. If a Forest's market area has a large urban population, it can expect higher demand and for that demand to increase at higher rates than their rurally-situated counterparts. Also, the urban-rural character of the population is important to consider in recreation management because people's outdoor recreation activities differ accordingly. The figure above shows the distribution of the regional and market area population according to urban and rural status.
- ▶ If you marketed to urban or rural groups, which activities would you emphasize?

Favored Activities by Urban/Rural Strata (Source: Table III. 4f1-2)

Urban/Rural Strata	Favored Activities	Percent of Urban/Rural Group in Market Area
Urban	1. Backpacking 2. Swimming in streams, lakes, ponds, or the ocean 3. Primitive camping 4. Drive off-road 5. Visit waterside besides beach	66.6
Rural	1. Horseback riding 2. Big game hunting 3. View birds 4. View wildlife 5. Gather mushrooms, berries, and other non-timber products	33.4

Step 4.6.b – Future Urban and Rural Distribution

How Will Urban/Rural Populations Change 2000 - 2020? (Source: Table II. 6e)

	Market Area		Region 8	
	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020	Absolute change (1000's), 2000 to 2020	Percent change, 2000 to 2020
Urban	604.6	38.3	18,276.6	28.3
Rural	129.7	16.4	2,870.4	11.8

- ▶ Over the next 50 years, all markets in the United States that contain urban areas are expected to significantly increase their rates of rural land conversion as suburbs sprawl out into rural lands. Between 1992 and 1997 in the United States, nearly 16 million acres of farm, forest and other open land was converted to developed uses. These developments tend to follow highway corridors radiating out from the nation's urban areas. As more areas become urban in character, the activities urban people participate in are likely to experience increased demand.
- ▶ The table above shows percent increases in each of the strata in the market area, 2000-2020.
- ▶ Urban areas are the highest growth category in the market area.

- ▶ Given the changing urban/rural character of the market area, which activities would you want to consider providing more of in the future?

Step 4.6.c – Favored Activities of Fastest Growing Urban and Rural Groups

High Growth Strata	Favored Activities
Highest growth group	<ol style="list-style-type: none">1. Backpacking2. Swimming in streams, lakes, ponds, or the ocean3. Primitive camping4. Drive off-road5. Visit waterside besides beach

Step 4.7 – Disability

(Source: Table II. 7)

Step 4.7.a – Current Disability Distribution

- ▶ As a percentage of the population, the disabled population varies little from market area to market area. However, the disabled population is important to consider in recreation management because people's outdoor recreation activities are highly defined by disability status. The figure above shows the distribution in the region and market area of residents by disability status.
- ▶ If you managed to provide outdoor recreation settings for activities disproportionately enjoyed by disabled populations, which activities would you emphasize?

Favored Activities by Disability Strata (Source: Table III. 4g1-2)

Disability Strata	Favored Activities
Physical disability	<ol style="list-style-type: none"> 1. View birds 2. View wildlife 3. Swimming in streams, lakes, ponds, or the ocean
Other disability	<ol style="list-style-type: none"> 1. Swimming in streams, lakes, ponds, or the ocean 2. View birds 3. Warmwater fishing

Step 4.8 – Recreation Participation Analysis by Demographic Strata

- In the preceding pages covering Step 4, we have overviewed the favored activities of demographic groups and emphasized those growing the fastest. Before summing occurrence scores of activities across demographic categories, one more factor will be considered as a part of Step 4. Participation by some demographic groups—such as women’s participation in activities—have been increasing over time faster than by other demographic groups. For example, women report participating in activities 9.5 percent more in 2001 than in 1995. Higher rates of participation mean more overall demand. This suggests increased emphasis should be placed on the activities of demographic groups demonstrating the greatest increases in participation.

- ▶ The previous graph shows the increased participation 1995 -2001 for all demographic groups for the region as a whole.³ If you managed for the fastest growing groups in participation over time, what activities would you emphasize?
- ▶ The greatest increases in participation between 1995 and 2001 across all demographic groups occurred among 65 +, 55-64, Hispanic American, African American, and Female demographic groups.
- ▶ Because of their increases in participation, if you market more to these groups, what would you emphasize?

High Growth Strata	Favored Activities
1 st) 65+	1. View birds 2. View or photograph wildflowers, trees, or other natural vegetation 3. View or photograph fish
2 nd) 55-64	1. Small game hunting 2. View or photograph wildflowers, trees, or other natural vegetation 3. Mountain biking
3 rd) Hispanic American	1. Day hiking 2. Mountain biking 3. Developed camping
4 th) African American	1. Mountain biking 2. Small game hunting 3. View or photograph fish
5 th) Females	1. View birds 2. Horseback riding 3. View or photograph wildflowers, trees, or other natural vegetation 4. Horseback riding on trails 5. Gather mushrooms, berries, and other non-timber products

³ Income data is not available for this variable because income strata in the 1995 and 2001 NSRE are non-comparable.

Step 5. – Summing Step 4 Activity Scores Across Demographic Strata

Activity Ranking: Summary of Scoring Weights across all Demographic Segments

- ▶ Now we are ready to sum scores across all the activities in Step 4 - the demographic analyses - into one table. The table on the current page cumulates and rank orders the activities according to how many times they occurred in step 4 of the report. This is one indicator of their demand in the market area.
- ▶ In your market area, the following activities were most favored across groups:

Type II Activities	Total	Rank
Horseback riding	12	19
View birds	10	18
Mountain biking	9	17
Small game hunting	9	17
Backpacking	9	17
View or photograph wildflowers, trees, or other natural vegetation	8	14
Big game hunting	7	13
Gather mushrooms, berries, and other non-timber products	7	13
Primitive camping	7	13
View or photograph fish	7	13
Drive off-road	5	9
Day hiking	5	9
Developed camping	5	9
Horseback riding on trails	5	9
Swimming in streams, lakes, ponds, or the ocean	4	5
Visit waterside besides beach	3	4
View wildlife	3	4
Warmwater fishing	2	2
Visit a wilderness or other primitive, roadless area	1	1

Step 6. – Summing Activity Over 3 Dimensions of Demand

- ▶ In this report, we now have considered three dimensions of demand. In Step 2, we identified the most popular activities (overall demand) in the market area. In Step 3, we identified the fastest growing activities in the region. In Step 4, we identified activities according to their being favored across demographic strata. Here, we compare results across steps. The most popular activities in each step receive a rank of 19, the second most popular receive a rank of 18, down to 1 for least popular. Summing across ranks provides a single indicator of demand for activities in the market area
- ▶ This analysis reveals that in your market area viewing or photographing fish, viewing birds, and viewing or photographing wildflowers, trees, or other natural vegetation are the activities most in demand -- across 3 dimensions of demand.

Step 6. – Summing Activity Scores Over 3 Dimensions of Demand (Steps 2-4)

Type II Activities	Step 2 Score from Ranking Most Popular Activities in the Market Area (Source: table III 3d) ¹	Step 3 Score from Ranking by Rate of Growth in the Region (Source: Table III 3e)	Step 4 Score based on Cumulative Sum across Demographics Strata in the Market Area ³	Step 5 Total Score ⁴
View or photograph fish	15	18	13	46
View birds	16	7	18	41
View or photograph wildflowers, trees, or other natural vegetation	17	10	14	41
Backpacking	3	19	17	39
Swimming in streams, lakes, ponds, or the ocean	19	14	5	38
View wildlife	18	16	4	38
Mountain biking	10	10	17	37
Gather mushrooms, berries, and other non- timber products	12	10	13	35
Big game hunting	5	15	13	33
Developed camping	8	13	9	30
Small game hunting	6	5	17	28
Horseback riding on trails	1	17	9	27
Horseback riding	2	6	19	27
Visit waterside besides beach	13	10	4	27
Visit a wilderness or other primitive, roadless area	11	10	1	22
Drive off-road	9	4	9	22
Day hiking	7	3	9	19
Primitive camping	4	1	13	18
Warmwater fishing	14	2	2	18

¹ Most popular activities in the market area receive highest score, down to 1 for least popular of Type II activities (i.e., highest score = n, where n = number of activities)

² Fastest growing activities in the region receive highest score where growth rate in percent growth since 1995.

³ Highest cumulative scores (Type II activities) across demographics receive highest score.

⁴ Sum of scores across columns.

Step 7. – Identifying Niche Activities

- ▶ What if your NF has niche markets that you want to emphasize because of unique, high quality resources, e.g., whitewater experiences, wilderness experiences. We have designed an exercise to help you learn more about who the niche users for special recreation (i.e., rockclimbing or ORV use) are in your market area.

Exercise

- ▶ Turn to Appendix III, Tables 5-41 in your report. Identify the top 3 activities that you want to emphasize, that you know to be special attractions on your forest by reviewing the list of activities provided. Record the names of up to 3 niche activities below.

My Forest's Special Niche Activities

Niche Activities

Step 8. – Equity Analysis

For each niche activity you identified from Step 7 AND for the top three activities identified in Step 6 as being in highest demand, fill in the following worksheet. When completed this worksheet will identify who will be disproportionately served or not served if you manage for activities identified in Steps 6 and 7. The exercise is basically a Civil Rights analysis.

- ▶ Directions: To fill in the worksheet on the next page, follow the step-by-step directions that follow:
- a. Write in the top 3 activities identified in Step 6 and the top 3 niche activities from Step 7 (6 activities in total).
- b. Next, for each activity, record in the following table the ratio values found in Tables 5-41 in Appendix III (Note: there is a separate table for each activity). These values are found in column 4 (Ratio (1)/(2)).
- c. Then record the number of ratio values equal to or less than 0.9 for each demographic strata in the third from last column of the table below.
- d. Record the number of ratio values equal to or greater than 1.1 in the second from last column.
- e. Finally, subtract the number of values ≤ 0.9 from the number ≥ 1.1 and record this difference in the last column. If difference is < 0 , under service is suspected.

Demographic Strata	Ratios for Type II and III Activities Selected						Potential Equity Scores		
	Activity #1 _____	Activity #2 _____	Activity #3 _____	Activity #4 _____	Activity#5 _____	Activity #6 _____	Number 0.9 or less	Number 1.1 or more	Number 0.9's minus number 1.1's
Male									
Female									
Anglo-American									
African-American									
Asian, Native American									
Hispanic									
15-25 years old									
25-35 years old									
35-50 years old									
50-65 years old									
65+ years old									
< \$15K									
\$15-24,999									
\$25-49,999									
\$50-74,999									
\$75-99,999									
\$100,000 >									
Urban									
Rural									

Step 8.1 – Summarizing Your Equity Analysis

Your Equity Analysis shows that if you select to emphasize the following activities:
(List top 3 activities from Step 6 and the top 3 from Step 7)

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

- A. You will be orienting your recreation program toward service for:
(Record the names of the demographic strata with values in the last column of the Equity Analysis workshop that are $\geq +1$)

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

- B. You may disproportionately under-serve:
(Record the names of the demographic strata in the Worksheet that are ≤ -1)

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

- C. Now, considering the top 3 activities identified in both Steps 6 and 7 as being in greatest demand, and considering agency, federal and regional policy with respect to Civil Rights and service equity, list the activities below that you select to emphasize. Remember these are in addition to all the Type I, widely popular activities, that we recommend you provide whenever and wherever you can.

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____

Step 9. – Other Suppliers of Outdoor Recreation in your Market Area

- a. The table below shows the other suppliers of outdoor recreation in your market area (based on available data). It describes the number of acres in your market area of a variety of public lands and private providers including National Park (NPS) acres, Army Core of Engineers (COE) acres, among others, as well as data from the American Business Listings (ABI) for numbers of private recreation businesses in the market area.
- b. Take time here to bring your local knowledge to bear on the local market area scene and its implications for your recreation realignment.
- c. In light of the activities you selected, review the supply by other providers and consider your own knowledge of the mix of private and public suppliers in your management area.
- d. Does other supply adequately meet demands for the activities you selected?
- e. Do local providers meet demand for some of the selected activities better than your Forest?
- f. Evaluate each selected activity and note by each one in the work space following this table your assessment of your Forest's legitimate supply role.

Recreation Resource	Market Area		Region 8	
	Amount of resource	Amount per million population	Amount of resource	Amount per million population
NPS gross acres	768,123	64,350.8	5,411,892	60,809.1
COE Project total land and water acres	321,985	26,974.8	5,633,764	63,302.1
FWS refuge acres open for recreation	0	0	3,594,475	40,388.3
TVA recreation area acres	10,549	883.8	25,267	283.9
TVA undeveloped acres	130,336	10,919.1	414,876	4,661.6
Wild & Scenic River miles: Total 1992	133	11.1	446	5.0
NRI Total river miles, outstanding value	4,069	340.9	23,226	261.0

Recreation Resource	Market Area		Region 8	
	Amount of resource	Amount per million population	Amount of resource	Amount per million population
State Park areas	226,240	18,953.6	1,571,214	17,654.5
Woodalls number of public campgrounds	34	2.8	310	3.5
Woodalls number of public campground sites	3,166	265.2	25,853	290.5
Woodalls number of private campgrounds	267	22.4	1,852	20.8
Woodalls number of private campground sites	24,772	2,075.3	222,054	2,495.0
NRI acres private forest land	23,398,200	52.6	173,078,600	32.4
NPLOS acres leased to industry or groups	1,483,419	124,275.9	33,906,753	380,983.3
NPLOS acres open to general public	2,683,426	224,808.6	30,262,101	340,031.3
ABI number of hunting and fishing preserves	15	1.3	192	2.2
ABI number of fish camps	2	0.2	202	2.3
ABI number of organized camps	297	24.9	1,722	19.3
ABI number of private fishing lakes	3	0.3	24	0.3
ABI number of boat rental firms	62	5.2	2,054	23.1
ABI number of canoe trip outfitters	1	0.1	19	0.2
ABI number of canoe rental firms	12	1.0	73	0.8
ABI number of public fishing lakes	34	2.8	95	1.1

Recreation Resource	Market Area		Region 8	
	Amount of resource	Amount per million population	Amount of resource	Amount per million population
ABI number of guide services	13	1.1	361	4.1
ABI number of sightseeing tours	55	4.6	603	6.8
ABI number of fishing lakes and ponds	7	0.6	76	0.9
ABI number of raft trip firms	19	1.6	29	0.3

Observations concerning how the availability of other providers affect each selected activity.

Activity (list activities from Steps 6 and 7)	✓	Comments evaluating whether my NF is best positioned to provide this activity.
1.		
2.		
3.		
4.		
5.		
6.		

- Place a check (✓) beside each activity you have decided to recommend to the Forest Supervisor and District Rangers for management emphasis. Remember, all Type I activities are to be considered automatically selected.

Step 10. – Summary Observations, Concerns and Needed Follow-up

- ▶ Take a few minutes to review the findings from the overall demand in Step 6, the niche market analysis in Step 7, your equity analysis in Step 8, and your evaluation of other providers in step 9. In a facilitated session, it is recommended you discuss with other workshop participants the following questions:
 - ▶ What changes might be warranted in NFS recreation management in Region 8?
 - ▶ Are some types of NFS areas underused or overused? How can under- and over-use be addressed in recreation realignment?
 - ▶ Where is population growth and change coming from and what are the likely impacts on recreation programs on the Forest and in the Region?
 - ▶ What are the most popular activities overall and what are the implications for recreation management on the Forest and in the Region?
 - ▶ What are the disproportionately favored activities among subgroups of the population and what are the implications for recreation management?
 - ▶ What are the niche activities or settings on the Forest, who is served by them, and what are the implications for recreation management?
- ▶ Take some time to record your thoughts about what you learned in this workshop and what information might be useful in further realignment efforts and your recommendations to the Forest Supervisor and District Rangers.

Observations and Comments on Recreation Realignment Activities

Appendix I

I: OVERVIEW OF MARKET AREA

Table 1--Descriptive statistics for the FRANCIS MARION NATIONAL FOREST Market Area

FIPS code	County name	Number of NSRE interviews	Total population 2000	Total population 2020	Projected percent change, 2000 to 2020
37019	Brunswick, NC	5	76,598	140,714	83.7
45063	Lexington, SC	28	231,044	393,221	70.2
45051	Horry, SC	22	185,205	295,495	59.6
45035	Dorchester, SC	13	103,486	160,159	54.8
45015	Berkeley, SC	23	153,859	227,087	47.6
45013	Beaufort, SC	21	110,427	153,495	39.0
45053	Jasper, SC	8	17,970	24,186	34.6
45005	Allendale, SC	4	12,378	15,551	25.6
45079	Richland, SC	41	307,721	377,941	22.8
45043	Georgetown, SC	12	53,957	66,053	22.4
45017	Calhoun, SC	7	14,134	17,128	21.2

Appendix III

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 1--Objectives for managing public lands for recreation, Market Area and Region 8 respondents

Percent who said important or very important (and sample size)

FRANCIS MARION NATIONAL FOREST

Management objective	Market area percent	Market area sample size	Region 8 percent	Region 8 sample size
Designate trails for specific rec. uses	100.0	5	50.0	385
Introduce a recreation fee	92.6	7	60.4	321
Conserve & protect F&G (esp. water)	87.6	9	90.9	486
Inform public about recreation concerns	86.5	8	85.8	385
Designate more wilderness areas	86.2	8	57.2	376
Preserve 'wilderness' experience on F&G	76.7	16	66.9	468
Increase law enforcement efforts	73.3	13	69.1	347
Develop trail systems (nonmotorized rec)	67.4	10	55.2	391
Expand commercial recreation on F&G	47.7	12	39.1	385
Develop volunteer programs: maintenance	41.5	12	71.7	380
Expand access for motorized OHVs on F&G	30.4	12	21.2	382
Develop paved roads on F&G for access	29.7	7	26.2	386
Make easier to get permits for some uses	29.4	10	36.3	376
Develop trail systems (motorized rec.)	27.4	11	29.5	446

Source: NSRE 2000-2001

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 2--Vision of National Forest land management, Market Area and Region 8 respondents

Percent who said important or very important (and sample size)

FRANCIS MARION NATIONAL FOREST

Management objective	Market area percent	Market area sample size	Region 8 percent	Region 8 sample size
Maintain NFs for future generations' use	86.6	52	92.4	1380
Provide habitat for wildlife & fish	85.7	52	87.0	1380
Protect streams & sources of clean water	85.2	52	93.6	1380
Protect rare plant & animal species	80.2	52	85.0	1380
Use forest areas so they're left natural	77.5	52	85.1	1380
Emphasize planting & management of trees	75.7	52	77.4	1380
Provide info & educ services re: forests	74.1	52	78.8	1380
Provide access, facil. & services for OR	73.6	52	75.9	1380
Provide roads & serv. for local business	70.7	52	60.1	1380
Provide quiet, natural places	67.0	52	74.3	1380
Provide raw materials/prod. for industry	50.9	52	48.9	1380
Provide grazing permits to ranchers	47.0	52	51.6	1380

Source: NSRE 2000-2001

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Source: NSRE 2000-2001

Region 8 participation based on 2000 16+ pop. estimate of 69.1 million.

Market Area participation based on 2000 16+ pop. estimate of 77 percent of total Market Area population, the percentage of 16+ population in Region 8. (See very first table for total Market Area population.)

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 3b--Outdoor recreation activity participation in the Market Area and Region 8, 2001

ACTIVITY TYPE I: Broadly popular activities--provide or facilitate whenever possible.

Percent and millions of participants

Activity	MARKET AREA	MARKET AREA # particip.	REGION 8 Percent 2001	REGION 8 # particip. 2001
	Percent participated 2001			
Walk for pleasure	83.5	1.53	81.0	55.97
Family gathering	70.7	1.29	72.3	49.96
View/photograph natural scenery	53.7	0.98	55.5	38.35
Visit nature centers, etc	52.6	0.96	53.1	36.69
Visit historic sites	49.1	0.90	43.1	29.78
Picnicking	45.9	0.84	49.1	33.93
Sightseeing	45.8	0.84	51.4	35.52
Driving for pleasure	45.6	0.83	50.6	34.96
Bicycling	43.0	0.79	34.2	23.63
Boating	37.0	0.68	34.3	23.70
Motorboating	26.3	0.48	25.2	17.41

Source: NSRE 2000-2001

Region 8 participation based on 2000 16+ pop. estimate of 69.1 million.

Market Area participation based on 2000 16+ pop. estimate of 77 percent of total Market Area population, the percentage of 16+ population in Region 8. (See first table for total Market Area population.)

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 3c--Market Area trends in outdoor recreation activity participation:
Absolute and percent change in millions of participants, 1995 to 2001

ACTIVITY TYPE I: Broadly popular activities--provide or facilitate whenever possible.

Activity	Absolute change 1995 to 2001	Percent change in # participants 1995 to 2001
Bicycling	0.27	39.6
Walk for pleasure	0.45	30.9
Boating	0.19	28.9
Picnicking	0.19	20.2
Visit nature centers, etc	0.19	16.1
Family gathering	0.22	12.0
Motorboating	0.05	3.1
Visit historic sites	0.09	2.5
Sightseeing	-0.08	-15.5

Source: NSRE 2000-2001 and NSRE 1994-1995

Activities not appearing in trend tables were not comparable between 1995 and 2001.

Number of participants is based on proportion of 16+ population (77%) in Market Area for 1995 and 2000.

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 3d--Outdoor recreation activity participation in the Market Area and Region 8, 2001

ACTIVITY TYPE II: Activities especially suited for National Forests. Provide most popular ones.

Percent and millions of participants

Activity	MARKET AREA	MARKET AREA	REGION 8	REGION 8
	Percent participated 2001	# particip. 2001	Percent 2001	# particip. 2001
Swimming in natural water	47.2	0.86	40.0	27.64
View wildlife	40.9	0.75	42.5	29.37
View/photograph wildflowers, trees, etc.	36.7	0.67	42.4	29.30
View birds	28.6	0.52	30.8	21.28
View or photograph fish	28.5	0.52	25.5	17.62

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 4f.2--Outdoor recreation participation by demographic strata:
Most popular National Forest-based activities

Demographic category= METROPOLITAN STATUS, Strata= METROPOLITAN

Activity	Percent participating		Ratio of strata % to market area %
	Metropolitan	Total Market Area	
Backpacking	7.9	6.1	1.30
Swimming in natural water	55.8	47.2	1.18
Primitive camping	7.7	6.9	1.12
Drive off-road	19.5	17.5	1.11
Visit waterside besides beach	30.2	28.3	1.07
Visit a wilderness or other primitive area	26.9	25.1	1.07
Mountain biking	22.9	21.4	1.07
Day hiking	14.7	13.9	1.06
Small game hunting	10.9	10.8	1.01
Warmwater fishing	28.6	28.5	1.00
View or photograph fish	28.3	28.5	0.99
Developed camping	13.8	14.0	0.99
Horseback riding on trails	4.9	5.0	0.98
View/photograph wildflowers, trees, etc.	35.9	36.7	0.98
Gather mushrooms, berries, etc.	24.1	25.2	0.96
View wildlife	37.3	40.9	0.91
View birds	25.6	28.6	0.90
Big game hunting	7.4	8.6	0.86
Horseback riding	4.5	5.7	0.79

Total Market Area is percent of ALL respondents in the Market Area.

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 4g.1--Outdoor recreation participation by demographic strata:
Most popular National Forest-based activities

Demographic category= DISABLED, Type= PHYSICAL DISABILITY

Percent participating	
Activity	Percent participating
View birds	36.78
View wildlife	35.24
Swimming in natural water	29.80
Warmwater fishing	26.31
Developed camping	19.80
Day hiking	19.62
Drive off-road	18.33
Primitive camping	15.26
View or photograph fish	10.47
Big game hunting	7.54
Horseback riding	6.77
Small game hunting	6.27
Backpacking	6.17

Disability data are from NSRE 1994-1995. They are for all of Region 8, NOT just the Market Area.

III: RECREATION DEMAND IN THE NATIONAL FOREST MARKET AREA

Table 4g.2--Outdoor recreation participation by demographic strata:
Most popular National Forest-based activities

Demographic category= DISABLED, Type= OTHER DISABILITY (Non-physical)

Percent participating	
Activity	Percent participating
Swimming in natural water	33.82
View birds	33.39
Warmwater fishing	32.86
View wildlife	32.03
Developed camping	20.05
View or photograph fish	18.23
Drive off-road	17.75
Day hiking	15.76
Primitive camping	15.62
Big game hunting	9.26
Small game hunting	9.12
Horseback riding	8.87
Backpacking	3.38

Disability data are from NSRE 1994-1995. They are for all of Region 8, NOT just the Market Area.

Column percents sum to 100 within each demographic group. A ratio larger than 1.0 indicates that the proportion of people in a given demographic strata is larger for participants than it is for the population in general (i.e., the full Market Area sample). Percentages for the U.S. population are also shown for comparison.

Column percents sum to 100 within each demographic group. A ratio larger than 1.0 indicates that the proportion of people in a given demographic strata is larger for participants than it is for the population in general (i.e., the full Market Area sample). Percentages for the U.S. population are also shown for comparison.

Source: NSRE 2000-2001

Column percents sum to 100 within each demographic group. A ratio larger than 1.0 indicates that the proportion of people in a given demographic strata is larger for participants than it is for the population in general (i.e., the full Market Area sample). Percentages for the U.S. population are also shown for comparison.

Appendix IV

IV: LOCAL OUTDOOR RECREATION SUPPLIERS

Table 1--Amount of selected recreation resource acreages or facility counts in Market Area and Region 8

FRANCIS MARION NATIONAL FOREST

Recreation Resource	Amount of resource in MARKET AREA	Amount per million pop., MARKET AREA	Amount of resource in REGION 8	Amount per million pop., REGION-8
NPS gross acres	22,423	9,453.6	5,411,892	60,809.1
COE Project total land and water acres	0	0.0	5,633,764	63,302.1

IV: LOCAL OUTDOOR RECREATION SUPPLIERS

Table 2--Description of recreation resource abbreviations

Resource

NPS = U. S. Department of the Interior, National Park Service

COE = U. S. Army Corps of Engineers

FWS = U. S. Department of the Interior, Fish and Wildlife Service

TVA = Tennessee Valley Authority

NRI (total river miles) = 1993 Nationwide Rivers Inventory administered by the National Park Service.

WOODALLS = Woodall Publications. Ventura, CA. Publisher of "Woodall's Campground Directory". 1996.

NRI (private forest land) = 1992 National Resources Inventory, USDA-Natural Resources Conservation Serv.

NPL0S = 1995 National Private Land Owners Survey. USDA Forest Service. Southern Research Station.

ABI = American Business Information, Inc. Omaha, NE. Database of yellow-page telephone directories.
